

## Instant Voice Alert Application: Proposed by Tony Verna

The Instant Voice Alert App was designed as a service for the whole State of Montana and NOT solely for implementation by the State Emergency Coordination Center. Keep in mind that the app is mobile and office-free. While Montana may not be home rule, it does have self-government powers for which the app was designed to implement-- on the local level-- by county commissioners, chief elected officers, sheriffs, clerk of court, county attorneys and any others who have specific statutory responsibilities to their citizens. Plus, the app would also allow city and county officials to enhance 9-1-1 and/or any other emergency alert system currently in use.

The State of Montana will not need extra funding for the installation of an office to operate on a 24/7 basis. The accompanying illustration is an example of the app being mobile and office-free. Shown is an after-hours duty officer using his laptop (or smartphone) to send a middle-of-the night voice alert to registrants who may be in danger at that very instance. High risks must be dealt with now, and not as currently being done.

### how to..... Register

1. Applicants can download the App for their smartphone, laptop or computer,
2. Applicants must register an account with the App store supplying the app (Apple/Android)
3. Applicants enter a username and a password in order to register. Nothing more.
4. Applicants scroll down the screen and select the Montana Instant Voice Alert App.
5. Applicants select the **FREE** Button to install the App.
6. Applicants press **OK** Button to accept the permissions before downloading will begin.
